ODOR CONTROL For Auto Detailing/Car Wash

Auto Detailing and Vehicle Restoration Companies need exceptional products to aid in the elimination of smoke, musty smells, spoiled food, dead animal and other harsh odors. BioWorld's Odor Control Technology is the answer to resolve these persistent odor issues. Let BioWorld help you resolve these matters for your clientele with our **concentrated** odor neutralizers, foggers and accessories.

BioWorld Odor Neutralizer Concentrate (BON) is absolutely the best product available for neutralizing odors. BON is a completely safe and natural liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted (2 – 10%) and fogged into the vehicle and/or ventilation system using a Junior Fogger, Noz-L-Jet Fogger, or Triple Nozzle Fogger. Use BON to fog or spray inside the vehicle to control odors or use BON to wipe surfaces clean and deodorize. Add BON to upholstery or carpet shampoo and clean to eliminate odors in seats and carpets.

Other BioWorld clients have successfully used Fogging Equipment and BON-CC-41 for numerous types of odors associated with Auto Detailing/Car Wash.

Industrial and Commercial Applications – Foggers and BON
