ODOR CONTROL TECHNOLOGY For Medical Examiner's Office

Benefits of BioWorld Odor Control Technology

- Eliminate odors for a more pleasant and productive work environment.
- Eliminate odors from facility, bathrooms, dumpsters, trash cans, excreta, vomit, decomposition, ostomy and incinerator odors. • Special formulation available with disinfectant added to help sanitize air and surfaces.
- BON can be added to paints, solvents, cleaners and chemicals to eliminate harsh odors when maintenance, roofing, and flooring repair work is implemented.
- BON is used as a key component in a low odor, low VOC paint which received Green Seal Certification.
- Environmentally safe, easy to use, cost effective – BON is concentrated which provides you with more product for your money.

BON (Fred from California) Customer comment: "We discovered an unattended death in my rental home. The deceased had been in the home for about two weeks before being found. The odor was so terrible you could hardly walk into the home. BON worked better than anything I tried for the dead body odor. It took several applications and I had to apply the BON under the house and everywhere I could possibly get it because the odor was so bad it had gone into the walls and under the house, but now, thanks to BioWorld the odor is gone!!"

Developer of BioWorld Products

BioWorld Odor Neutralizer (BON Concentrate) is absolutely the best product available for neutralizing odors. BON is a completely safe and natural liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted (2 – 10%) and fogged into the air or ventilation system using a Triple Nozzle Fogger, Noz-L-Jet Fogger, drum mounted fogger or industrial misting system. Any fogger can be set up with a repeat cycle timer to automate the frequency and duration of odor neutralizer application.

BioWorld Liquid Optimizer Plus is a unique concentrate bioenhancement liquid with added odor neutralizing compounds. Diluted Liquid Optimizer Plus (2 – 25%) can be sprayed directly onto organic matter in dumpsters and trash cans to help accelerate the degradation process while minimizing odors in the process.

Industrial and Commercial Applications – Liquid Optimizer Plus

#55014 Liquid Optimizer Plus **Concentrate** 1 gallon

#55414 Liquid Optimizer Plus **Concentrate** 4 x 1 gallon case

#55064 Liquid Optimizer Plus **Concentrate** 6 gallon

Industrial and Commercial Applications – Foggers and BON

#F8026 Triple Nozzle

#F7087S Noz-L-Jet

#DT8246 Pow-R-Fog Plus
