BioWorld Septic Treatment

BioWorld Septic Treatment uses a unique combination of bioenhancement compounds and mature strains of selected, naturally occurring microorganisms for the complete treatment of septic tank waste.

BioWorld utilizes the following two technologies:

- 1. Bioenhancement** – The special Liquid Optimizer formulation maximizes the ability of the microbes to reproduce and thrive in the septic system.
- 2. Bioaugmentation** – General Blend Microbes consist of various bacillus and other digestive strains for organic waste degradation.

BioWorld Septic Treatment is environmentally safe, non-hazardous, non-toxic, non-corrosive, non-flammable, and non-pathogenic.

#86186—Septic Treatment Unit (11 lbs.)

(Consists of 1-gallon BioWorld Liquid Optimizer & ½-pound General Blend Microbes)

Composition and Physical Properties

Liquid: Bioenhancement Compounds, Vitamins, Minerals, Amino Acids, Polysaccharides, Esters, Alcohols, Oils, Proteins, Natural Liquid Enzymes, Organic Surfactants, Odor Neutralizing Compounds.

pH: 5.5 – 6.5
Boiling Point: 212°F/100°C
Freezing Point: 32°F / 0°C
Solubility in Water: 100%
Specific Gravity: 1.0028
Appearance & Odor: Blue-Green; Floral Odor

Dry: Selected bacillus and other digestive strains, natural enzymes on a bran carrier.

Concentration: Maximum viable CFU/g - strain and type dependent
Form: Free Flowing Powder
Color: Light Brown
Odor: Yeast Like
pH: Neutral
Effective pH Range: 5-9
Optimum Temperature: 40° – 110°F

Store in a cool dry place and avoid freezing. For best results, treat monthly at the targeted rate for a household of 2 to 4 people with 1 cup of liquid and 1 scoop of microbes – The BioWorld Treatment unit will last 14 to 16 months. Larger systems may require additional product amounts.
