RECYCLING CENTER ODOR CASE STUDY

Project Situation

A transfer and recycling facility handles cans, bottles and other recyclables. During the daily operation, odors from organic residues are emitted. The company contacted BioWorld and purchased several drum mounted foggers and BioWorld Liquid Optimizer Plus. The company also desired a custom blend formulation with mint and BioWorld met their need. The drum mounted foggers with diluted Optimizer Plus - Mint were set up in several locations. The odor control fog was directed into the appropriate areas as needed to control odors during the day.

Products/Technology Used

#55064 BioWorld Liquid Optimizer Plus - Special Formula Mint
#DT8246 Pow-R-Fog Plus Drum Mounted Fogger

Results

Odors were significantly reduced. On-going use has kept odors to a minimum. The BioWorld set up was simple to install, light weight, mobile, and cost effective.
