CASINO CRUISE ODOR CASE STUDY

Project Situation

A casino cruise line experienced odor issues from the 6,000 gallon wastewater storage tank on board. Their desire was to accelerate digestion of the organic waste in the tank, reduce odors in the process and eliminate any customer complaints. As a result, BioWorld Optimizer Plus was purchased and added to the wastewater on a regular basis.

Products/Technology Used

#55064 BioWorld Liquid Optimizer Plus

Results

The odors associated with the wastewater were eliminated. On-going treatment during the casino cruise has continued to control odors, making for happy customers.
