Guide for BioWorld Bioremediation Products Application

Step 1: Hydrate Microbes in warm water (100-105° F) or (37-42° C) for 10-15 Minutes
(Proceed with Step 2 while waiting)

Step 2: Apply BioWorld Bioremediation Enhancer with a sprayer

Step 3: Filter and apply Microbe Solution to the same area as Enhancer with a sprayer

Work product into ground with a shovel or rake. Add water and turn over surface soil every week or more often as needed. Keep treated soil moist and loose.
