GYMNASTIC ACADEMY ODOR CASE STUDY

Project Situation

A gymnastics academy business faced odor problems associated with body odors on a daily basis. A Triple Nozzle Fogger and Odor Neutralizer were purchased and used inside the building. Initially, the building was fogged with a diluted BON-SA-45 odor neutralizer solution every other day with very good results. After a month of use, different areas in the building were fogged every three days. During fogging, gym mats were also stood up on end so the BON-SA-45 could penetrate each side of mat.

Products/Technology Used

#45014 BioWorld Odor Neutralizer BON-SA-45 Concentrate
#F8026 Triple Nozzle Fogger

Results

The F8026 fogger with diluted BON-SA-45 was set up and used on a regular basis. Fogging was completed in the morning before the gym opened. Body odors were eliminated with the environmentally safe BON. On-going use has continued to keep odors to a minimum. The gymnastics academy personnel were extremely pleased with the results.
