MUNICIPAL WASTEWATER ODOR CASE STUDY

Project Situation

A municipal wastewater treatment facility in Missouri was experiencing odor problems from several lift stations. Several drum mounted micro jet fogger units were purchased, mounted on 55 gallon drums containing diluted BioWorld Odor Neutralizer and placed adjacent to the lift stations.

Products/Technology Used

#41064 BioWorld Odor Neutralizer BON-CC-41 Concentrate

#DT1247 Micro Jet Fogger

Results

The odors were completely eliminated. On-going treatment has controlled the lift station odors emanating from the facility.
