Eliminate Odors from Compost, Waste Piles, Rendering, Garbage and Dumpsters

Compost operations, waste piles, rendering plants, garbage and dumpsters are known to generate odors. When odors are present and complaints ensue, a quick response is essential. Let BioWorld help you with our biotechnology formulations, odor neutralizers, foggers and accessories.

Liquid Optimizer Plus is a unique **concentrate** bioenhancement liquid with added odor neutralizing compounds. Diluted Liquid Optimizer Plus can be sprayed directly onto the organic matter to help accelerate the degradation process while minimizing odors in the process.

BioWorld Odor Neutralizer Concentrate (BON) is absolutely the best product available for neutralizing odors. BON is a completely safe and natural liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted (2 – 10%) and fogged into the air using a Triple Nozzle Fogger, Noz-L-Jet Fogger, drum mounted fogger or industrial misting system. Any fogger can be set up with a repeat cycle timer to automate the frequency and duration of odor neutralizer application.

Our clients have used a combination of these equipment, products and technology to effectively resolve odor issues associated with their facilities.

Industrial and Commercial Applications – Liquid Optimizer Plus

#55014 Liquid Optimizer Plus **Concentrate** 1 gallon

#55414 Liquid Optimizer Plus **Concentrate** 4 x 1 gallon case

#55064 Liquid Optimizer Plus **Concentrate** 6 gallon
