Odor Control Technology for Hotels and Resorts

Hotels and Resorts have guests arriving daily for business, vacation, fun and relaxation. With so many guests being accommodated at these facilities, it is inevitable that odors (such as smoke, food and body odors) may become a problem. Hotels and Resorts are expected to maintain a safe and healthy environment for guests. When odors appear, a quick response is essential. Let BioWorld help you maintain a pleasant environment for your clientele with our odor neutralizers, foggers and accessories.

BioWorld Odor Neutralizer (BON) is absolutely the best product available for neutralizing odors. **BON is a completely safe and natural** liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted (2 – 10%) and fogged into the air or ventilation system using a Triple Nozzle Fogger, Noz-L-Jet Fogger, drum mounted fogger or industrial misting system. Use BON to fog or spray inside facilities to control odors or use BON to wipe surfaces. Your customers will definitely notice a difference!

BON can be added to solutions or used to clean and eliminate odors from:

- Counter tops/tables
- Food spills
- Trash cans
- Bathroom areas
- Paints, solvents, chemicals and cleaners
- Add Bon to shampoo and clean carpets and upholstery.
- BON can be added to paints, solvents, cleaners and chemicals to eliminate harsh odors when maintenance, roofing, and flooring repair work is implemented.
- BON is used as a key component in a **low odor, low VOC** paint which received Green Seal Certification.

Other BioWorld clients have successfully used a Triple Nozzle Fogger and BON-CC-41 for numerous types of odors associated with Hotels and Resort rooms. Repeat cycle timers, turntables and customized misting systems are also available.
