ODOR CONTROL TECHNOLOGY FOR SCHOOLS

Schools, learning centers and daycares are expected to foster and maintain a safe and healthy environment for students, visitors and staff. When odors appear, a quick response is essential. Let BioWorld help maintain a pleasant environment in your facility with our BioWorld Liquid Optimizer Plus, odor neutralizers, foggers and accessories.

BioWorld Odor Neutralizer (BON Concentrate) is absolutely the best product available for neutralizing odors. BON is a completely safe and natural liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted (2 – 10%) and fogged into the air or ventilation system using a Triple Nozzle Fogger, Noz-L-Jet Fogger, drum mounted fogger or industrial misting system. Any fogger can be set up with a repeat cycle timer to automate the frequency and duration of odor neutralizer application.

BioWorld Liquid Optimizer Plus is a unique **concentrate** bioenhancement liquid with added odor neutralizing compounds. Diluted Liquid Optimizer Plus (2 – 25%) can be sprayed directly onto organic matter in dumpsters and trash cans to help accelerate the degradation process while minimizing odors in the process.

BioWorld Advantages

- Unpleasant odors - making them undetectable
- Special formulation available with disinfectant added to help sanitize air and surfaces. Eliminate odors from classrooms, bathrooms, kitchens, lunchrooms, nurse's office, dumpsters, trash cans, vomit, and chemical odors.
- Add Bon to shampoo and clean carpets and upholstery. BON can be added to paints, solvents, cleaners and chemicals to eliminate harsh odors when maintenance, roofing, and flooring repair work is implemented.
- Environmentally safe, economical and easy to use.
- Cost effective – BON is concentrated which provides you with more product for your money. Equipment available for many applications for small, medium or large-scale projects including custom designed industrial fogging systems.

Other School Districts have used a Triple Nozzle Fogger and BON-CC-41 for skunk odors, athletic building odors and chemical odors. A Noz-L-Jet Fogger has been used with water-based pesticides/disinfectants to eradicate fungus and ringworm. Repeat cycle timers, turntables and customized misting systems are also available.
