Visalia, CA 93279-2920

Dear Ms. Barnes;

Thank you for your continued interest in gaining licensing for use of your product "Bio World BHT." We received and reviewed the application and supporting documentation you provided. The information contained with your application package satisfies the breadth of information required by regulations.

Enclosed is your license for the Oil Spill Cleanup Agent (OSCA's) "Bio World BHT". Unless revoked for good cause, this license will remain valid until January 20, 2014. At the time of renewal, a \$100 fee must be submitted to us, along with a written confirmation that the composition of your product has not been altered and that it meets the current licensing requirements. Please be aware that the appropriateness of product use will be made on a case-by-case basis at the time oil is released into the waters of the State and is contingent upon approval by the Administrator of the Office of Spill Prevention and Response and the Regional Response Team, Region IX. Finally, the Office of Spill Prevention and Response restricts the use of loose particulate materials for purposes of on-water spill response. As such, loose particulate materials must be contained, either in pillows, socks, or within the confines of booms or booming operations, for use in cleanup for all waters of the State.

Should you have any questions or need any additional information regarding this letter or the licensing of your product, please contact Staff Environmental Scientist, Ms. Yvonne Najah Addassi at telephone number (916) 324-7626.

Sincerely,

Stephen Edinger

Administrator

Office of Spill Prevention and Response
