## ODOR CONTROL TECHNOLOGY

### For Paint Manufacturers and Wood Crafting Companies

Paint and wood finish odors can be very harsh to the human sense of smell. Paint Manufacturers and Wood Crafting Companies can receive complaints from nearby companies or residential neighbors. When these odors are present, a quick response is essential to eradicate complaints and keep business running smoothly. BioWorld can help maintain an efficient business environment with our odor neutralizers, foggers and accessories.

BioWorld Odor Neutralizer (BON-CC-41) is absolutely the best product available for neutralizing odors. BON is a completely safe and natural liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell.

For paint and wood crafting companies, BON can be added directly to the paint or wood finish to eliminate odors caused by these products. BON is used as a key component in a **low odor, low VOC** paint which received **Green Seal Certification**. BON can be fogged into the air using a Triple Nozzle Fogger, Noz-L-Jet Fogger, drum mounted fogger or industrial misting system. Use BON to fog or spray inside facilities to control odors caused by paint booths.

Other clients have successfully used the BON-CC-41 and Fogging Equipment for paint and chemical odors and other major odor problems. Repeat cycle timers, turntables and customized misting systems are also available.

### Industrial and Commercial Applications – Foggers and BON

#F8026 Triple Nozzle

#F7087S Noz-L-Jet

#DT8246 Pow-R-Fog Plus

#41014 BON-CC-41 Concentrated – 1 Gallon  
#41414 BON-CC-41 Concentrated – 4 x 1 Gallon  
#41064 BON-CC-41 Concentrated – 6 Gallon
