## ODOR CONTROL TECHNOLOGY For Skunk Odors

Skunk odors can affect homeowners, businesses and schools at any given time. When skunks become trapped under home/building foundations, mark areas around homes or buildings or die while being trapped within these areas, the odor can be unbearable. BioWorld's Odor Control Technology is the answer to resolve these persistent odor issues with our environmentally safe BioWorld Liquid Optimizer Plus, **concentrated** odor neutralizers, foggers and accessories.

**BioWorld Liquid Optimizer Plus** is a unique **concentrate** bioenhancement liquid with added odor neutralizing compounds. Diluted Liquid Optimizer Plus can be sprayed directly onto organic matter to control odors in areas where animals have died and decomposed. Product is applied with a tank sprayer to affected areas to help accelerate the degradation process while minimizing odors in the process.

**BioWorld Odor Neutralizer (BON Concentrate)** is absolutely the best product available for neutralizing odors. BON is a completely safe and natural liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted and fogged or sprayed into the air, ventilation system or foundation areas using a Triple Nozzle Fogger or Noz-L-Jet Fogger. Any fogger can be set up with a repeat cycle timer to automate the frequency and duration of odor neutralizer application.

### BioWorld Advantages

- Unpleasant odors - making them undetectable
- Special formulation available with disinfectant added to help sanitize air and surfaces.
- Eliminate odors from skunk spray or animal decomposition, and other harsh odors.
- BON can be added to paints, solvents, cleaners, and chemicals to eliminate harsh odors when these types of products are used.
- BON is used as a key component in a **low odor, low VOC** paint which received Green Seal Certification.
- Environmentally safe, economical and easy to use.
- Cost effective – BON is concentrated which provides you with more product for your money. Equipment available for many applications for small, medium or large-scale projects including custom designed industrial fogging systems.
